## Profile

I'm Inês, 24 years old and I'm Portuguese, Since very young I have always been very creative and connected to the arts.

I breathe music, inspiration and innovation and every day always willing to learn more and grow visually.

I am a designer and I love what I do, my thoughts are always to go further and I am always up to date with the new trends.

I consider myself a very responsible, creative, punctual and humble person, with the capacity to work alone or in a team. In the various projects I have developed along my path, I have demonstrated a capacity for quick adaptation, good communication and social skills. I am dynamic, objective, a good listener, and communicative. I like to work, to learn, to get new skills, new professional experiences, and to be able to deal with new software in the Design area.

I am available to work in this area and willing to assume new challenges and to grow professionally.
